

Vermilion supports the Protection Civile as part of its Global Emergency Responder program .

This global program, now in its fifth year, supports our HSE commitment by investing in emergency response organizations that serve the communities in which we work and live.

Our partnership with the Protection Civile de Seine-et-Marne began in 2020 and was extended into 2021. Last year, for example, our grant enabled the purchase of 10 multi-parameter monitors to be installed in their response vehicles.

The official handover of this equipment took place on Saturday, February 19, during the association's 50th anniversary ceremony.

Vermilion is proud to support the Protection Civile and their mission to protect, to alert, and to help in Seine-et-Marne.
