

Q1 2021

MANAGEMENT'S DISCUSSION AND ANALYSIS

EXCELLENCE. TRUST. RESPECT. RESPONSIBILITY.

INTERNATIONALLY DIVERSIFIED | FREE CASH FLOW FOCUSED

VERMILION
ENERGY

Front Cover Theme

This year's front cover photo was taken at one of Vermilion's field offices in southern France. It represents the seeds of our international expansion in 1997, which was a major pillar of our free cash flow-generating business model, and our commitment to ESG matters of importance. Vermilion prioritizes health, safety and the environment in all of our operations – and we take this even further. Partnering with our stakeholders to enrich the lives of the people in the communities where we live and work is fundamental in our approach to what we do every day, and has been a focus for more than two decades.

The photo also represents a return to a more conservative approach to executing our business model, as we did with subsequent international expansions. This provides a renewed focus on our core business principles, which are (i) maintaining a strong balance sheet with low leverage; (ii) managing a total payout ratio of less than 100%; (iii) consistently delivering results that meet or exceed expectations; (iv) protecting equity to minimize dilution; and (v) maintaining a strong corporate culture. These principles were implemented when Vermilion started paying a distribution as an energy trust in 2003, and will shepherd us to providing long-term value creation for our shareholders moving forward.

Disclaimer

Certain statements included or incorporated by reference in this document may constitute forward looking statements or financial outlooks under applicable securities legislation. Such forward looking statements or information typically contain statements with words such as "anticipate", "believe", "expect", "plan", "intend", "estimate", "propose", "project", or similar words suggesting future outcomes or statements regarding an outlook. Forward looking statements or information in this document may include, but are not limited to: capital expenditures; business strategies and objectives; operational and financial performance; estimated reserve quantities and the discounted net present value of future net revenue from such reserves; petroleum and natural gas sales; future production levels (including the timing thereof) and rates of average annual production growth; exploration and development plans; acquisition and disposition plans and the timing thereof; operating and other expenses, including the payment and amount of future dividends; royalty and income tax rates; and the timing of regulatory proceedings and approvals.

Such forward looking statements or information are based on a number of assumptions, all or any of which may prove to be incorrect. In addition to any other assumptions identified in this document, assumptions have been made regarding, among other things: the ability of Vermilion to obtain equipment, services and supplies in a timely manner to carry out its activities in Canada and internationally; the ability of Vermilion to market crude oil, natural gas liquids, and natural gas successfully to current and new customers; the timing and costs of pipeline and storage facility construction and expansion and the ability to secure adequate product transportation; the timely receipt of required regulatory approvals; the ability of Vermilion to obtain financing on acceptable terms; foreign currency exchange rates and interest rates; future crude oil, natural gas liquids, and natural gas prices; and management's expectations relating to the timing and results of exploration and development activities.

Although Vermilion believes that the expectations reflected in such forward looking statements or information are reasonable, undue reliance should not be placed on forward looking statements because Vermilion can give no assurance that such expectations will prove to be correct. Financial outlooks are provided for the purpose of understanding Vermilion's financial position and business objectives, and the information may not be appropriate for other purposes. Forward looking statements or information are based on current expectations, estimates, and projections that involve a number of risks and uncertainties which could cause actual results to differ materially from those anticipated by Vermilion and described in the forward looking statements or information. These risks and uncertainties include, but are not limited to: the ability of management to execute its business plan; the risks of the oil and gas industry, both domestically and internationally, such as operational risks in exploring for, developing and producing crude oil, natural gas liquids, and natural gas; risks and uncertainties involving geology of crude oil, natural gas liquids, and natural gas deposits; risks inherent in Vermilion's marketing operations, including credit risk; the uncertainty of reserves estimates and reserves life and estimates of resources and associated expenditures; the uncertainty of estimates and projections relating to production and associated expenditures; potential delays or changes in plans with respect to exploration or development projects; Vermilion's ability to enter into or renew leases on acceptable terms; fluctuations in crude oil, natural gas liquids, and natural gas prices, foreign currency exchange rates and interest rates; health, safety, and environmental risks; uncertainties as to the availability and cost of financing; the ability of Vermilion to add production and reserves through exploration and development activities; the possibility that government policies or laws may change or governmental approvals may be delayed or withheld; uncertainty in amounts and timing of royalty payments; risks associated with existing and potential future law suits and regulatory actions against Vermilion; and other risks and uncertainties described elsewhere in this document or in Vermilion's other filings with Canadian securities regulatory authorities.

The forward looking statements or information contained in this document are made as of the date hereof and Vermilion undertakes no obligation to update publicly or revise any forward looking statements or information, whether as a result of new information, future events, or otherwise, unless required by applicable securities laws.

This document contains metrics commonly used in the oil and gas industry. These oil and gas metrics do not have any standardized meaning or standard methods of calculation and therefore may not be comparable to similar measures presented by other companies where similar terminology is used and should therefore not be used to make comparisons. Natural gas volumes have been converted on the basis of six thousand cubic feet of natural gas to one barrel of oil equivalent. Barrels of oil equivalent (boe) may be misleading, particularly if used in isolation. A boe conversion ratio of six thousand cubic feet to one barrel of oil is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

Financial data contained within this document are reported in Canadian dollars, unless otherwise stated.

Abbreviations

\$M	thousand dollars
\$MM	million dollars
AECO	the daily average benchmark price for natural gas at the AECO 'C' hub in Alberta
bbl(s)	barrel(s)
bbls/d	barrels per day
boe	barrel of oil equivalent, including: crude oil, condensate, natural gas liquids, and natural gas (converted on the basis of one boe for six mcf of natural gas)
boe/d	barrel of oil equivalent per day
GJ	gigajoules
LSB	light sour blend crude oil reference price
mbbls	thousand barrels
mcf	thousand cubic feet
mmcf/d	million cubic feet per day
NBP	the reference price paid for natural gas in the United Kingdom at the National Balancing Point Virtual Trading Point.
NGLs	natural gas liquids, which includes butane, propane, and ethane
PRRT	Petroleum Resource Rent Tax, a profit based tax levied on petroleum projects in Australia
tCO ₂ e	tonnes of carbon dioxide equivalent
TTF	the price for natural gas in the Netherlands, quoted in megawatt hours of natural gas, at the Title Transfer Facility Virtual Trading Point
WTI	West Texas Intermediate, the reference price paid for crude oil of standard grade in US dollars at Cushing, Oklahoma

Management's Discussion and Analysis

The following is Management's Discussion and Analysis ("MD&A"), dated April 28, 2021, of Vermilion Energy Inc.'s ("Vermilion", "we", "our", "us" or the "Company") operating and financial results as at and for the three months ended March 31, 2021 compared with the corresponding periods in the prior year.

This discussion should be read in conjunction with the unaudited condensed consolidated interim financial statements for the three months ended March 31, 2021 and the audited consolidated financial statements for the years ended December 31, 2020 and 2019, together with the accompanying notes. Additional information relating to Vermilion, including its Annual Information Form, is available on SEDAR at www.sedar.com or on Vermilion's website at www.vermilionenergy.com.

The unaudited condensed consolidated interim financial statements for the three months ended March 31, 2021 and comparative information have been prepared in Canadian dollars, except where another currency has been indicated, and in accordance with IAS 34, "Interim Financial Reporting", as issued by the International Accounting Standards Board ("IASB").

This MD&A includes references to certain financial and performance measures which do not have standardized meanings prescribed by International Financial Reporting Standards ("IFRS"). These measures include:

- **Fund flows from operations:** Fund flows from operations is a measure of profit or loss in accordance with IFRS 8 "Operating Segments". Please see "Segmented Information" in the "Notes to the Condensed Consolidated Interim Financial Statements" for a reconciliation of fund flows from operations to net earnings. We analyze fund flows from operations both on a consolidated basis and on a business unit basis in order to assess the contribution of each business unit to our ability to generate income necessary to pay dividends, repay debt, fund asset retirement obligations and make capital investments.
- **Free cash flow:** Represents fund flows from operations in excess of capital expenditures. We use free cash flow to determine the funding available for investing and financing activities, including payment of dividends, repayment of long-term debt, reallocation to existing business units, and deployment into new ventures. We also assess free cash flow as a percentage of fund flows from operations, which is a measure of the percentage of fund flows from operations that is retained for incremental investing and financing activities.
- **Net debt:** Net debt is a capital management measure in accordance with IAS 1 "Presentation of Financial Statements". Net debt is comprised of long-term debt plus current liabilities less current assets and represents Vermilion's net financing obligations after adjusting for the timing of working capital fluctuations. Net debt excludes non-current lease obligations which are secured by a corresponding right-of-use asset. Please see "Capital disclosures" in the "Notes to the Condensed Consolidated Interim Financial Statements" for additional information.
- **Netbacks:** Netbacks are per boe and per mcf performance measures used in the analysis of operational activities. We assess netbacks both on a consolidated basis and on a business unit basis in order to compare and assess the operational and financial performance of each business unit versus other business units and also versus third party crude oil and natural gas producers.

In addition, this MD&A includes references to certain financial measures which are not specified, defined, or determined under IFRS and are therefore considered non-GAAP financial measures. These non-GAAP financial measures are unlikely to be comparable to similar financial measures presented by other issuers. For a full description of these non-GAAP financial measures and a reconciliation of these measures to their most directly comparable GAAP measures, please refer to "Non-GAAP Financial Measures".

Product Type Disclosure

Under National Instrument 51-101 "Standards of Disclosure for Oil and Gas Activities", disclosure of production volumes should include segmentation by product type as defined in the instrument. In this report, references to "crude oil" and "light and medium crude oil" mean "light crude oil and medium crude oil" and references to "natural gas" mean "conventional natural gas".

In addition, in Supplemental Table 4 "Production", Vermilion provides a reconciliation from total production volumes to product type and also a reconciliation of "crude oil and condensate" and "NGLs" to the product types "light crude oil and medium crude oil" and "natural gas liquids".

Production volumes reported are based on quantities as measured at the first point of sale.

Guidance

On January 18, 2021, we released our 2021 capital budget and associated production guidance, which reflects a more level-loaded capital program compared to the prior year.

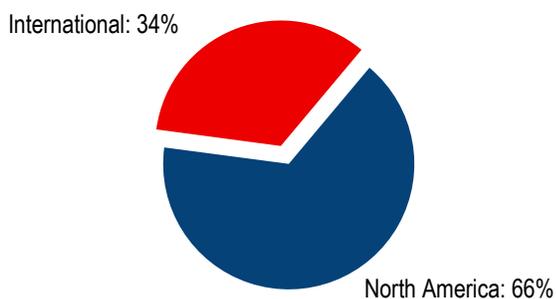

The following table summarizes our guidance:

	Date	Capital Expenditures (\$MM)	Production (boe/d)
2021 Guidance			
2021 Guidance	January 18, 2021	300	83,000 to 85,000

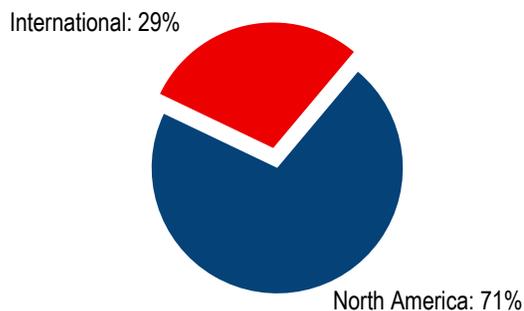

Vermilion's Business

Vermilion is a Calgary, Alberta based international oil and gas producer focused on the acquisition, exploration, development, and optimization of producing properties in North America, Europe, and Australia. We manage our business through our Calgary head office and our international business unit offices.

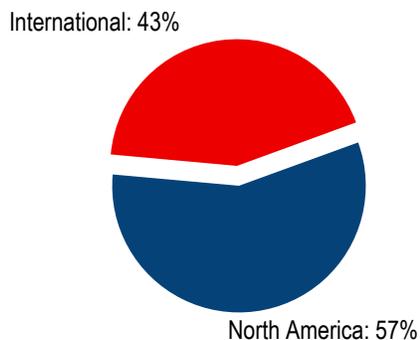

Q1 2021 production of 86,276 boe/d

Q1 2021 capital expenditures of \$83.4MM

Q1 2021 fund flows from operations of \$162.1MM

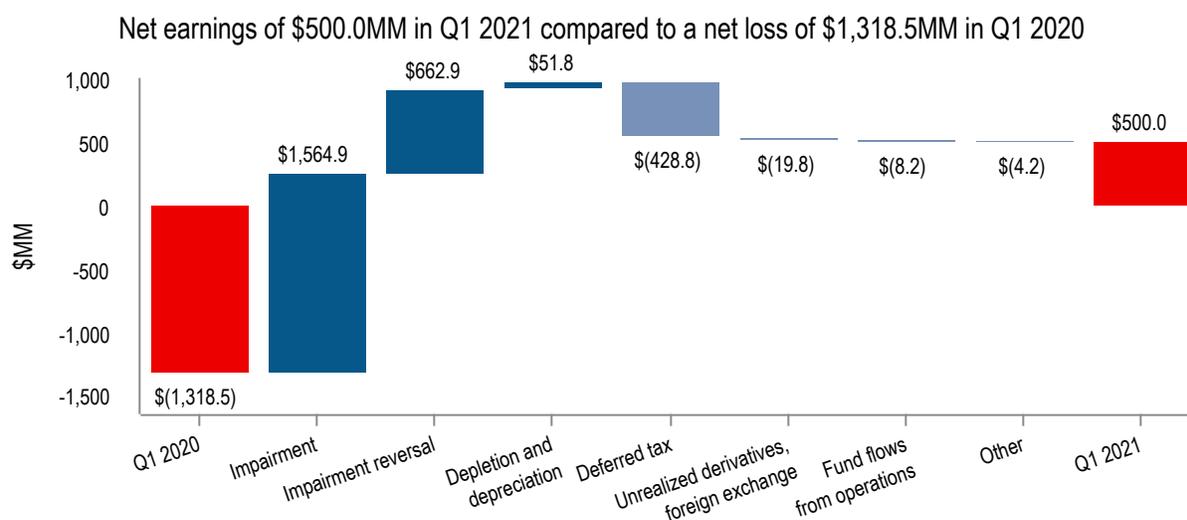

Consolidated Results Overview

	Q1 2021	Q1 2020	Q1/21 vs. Q1/20
Production ⁽¹⁾			
Crude oil and condensate (bbls/d)	39,204	44,881	(13)%
NGLs (bbls/d)	8,074	8,022	1%
Natural gas (mmcf/d)	233.98	265.51	(12)%
Total (boe/d)	86,276	97,154	(11)%
Build (draw) in inventory (mbbls)	282	(191)	
Financial metrics			
Fund flows from operations (\$M)	162,051	170,225	(5)%
Per share (\$/basic share)	1.02	1.09	(6)%
Net earnings (loss) (\$M)	499,964	(1,318,504)	N/A
Per share (\$/basic share)	3.15	(8.42)	N/A
Free cash flow	78,688	(63,479)	N/A
Net debt (\$M)	1,996,675	2,155,623	(7)%
Activity			
Capital expenditures (\$M)	83,363	233,704	(64)%
Acquisitions (\$M)	393	11,337	

⁽¹⁾ Please refer to Supplemental Table 4 "Production" for disclosure by product type.

Financial performance review

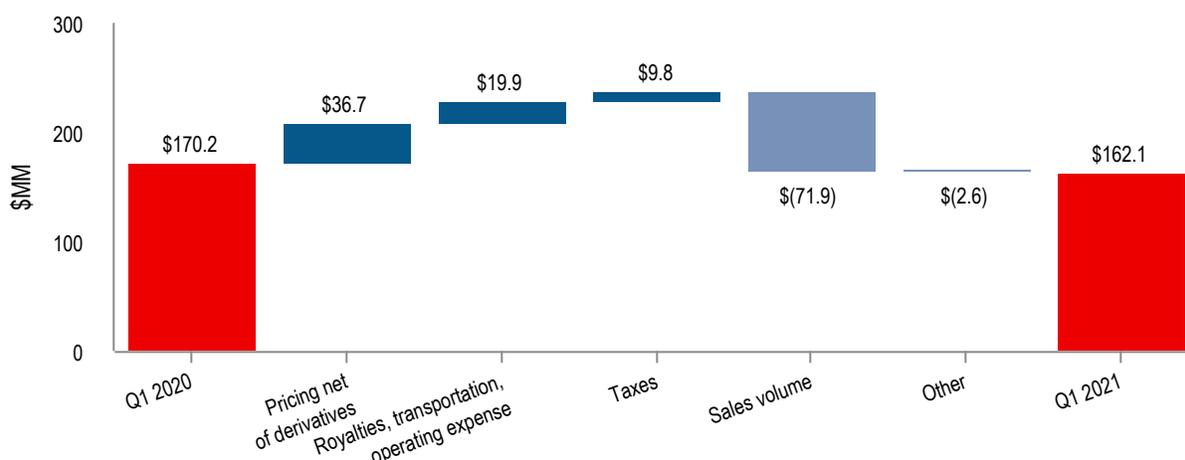

Q1 2021 vs. Q1 2020

"Other" contains equity based compensation and accretion expense

- We recorded net earnings of \$500.0 million (\$3.15/basic share) for Q1 2021 compared to a net loss of \$1,318.5 million (\$8.42/basic share) in Q1 2020. The increase was primarily driven by an impairment reversal of \$662.9 million in Q1 2021 compared to impairment charges of \$1,564.9 million in Q1 2020.

Fund flows from operations of \$162.1MM in Q1 2021 compared to \$170.2MM in Q1 2020

"Other" contains general and administration, interest, and realized foreign exchange

- We generated fund flows from operations of \$162.1 million in Q1 2021, a decrease from \$170.2 million in Q1 2020 primarily as a result of lower sales volumes due to natural declines and lower liftings in Australia. This was partially offset by higher commodity prices as our consolidated realized price per boe increased from \$36.35/boe in Q1 2020 to \$49.20/boe in Q1 2021.

Production review

Q1 2021 vs. Q1 2020

- Consolidated average production of 86,276 boe/d in Q1 2021 represented a decrease of 11% from Q1 2020 production of 97,154 boe/d. Production decreases were mainly in Canada of 7,130 boe/d, in Ireland of 1,206 boe/d, and in the Netherlands of 1,137 boe/d primarily attributable to natural decline.

Activity review

- For the three months ended March 31, 2021, capital expenditures of \$83.4 million were incurred.
- In our North America core region, capital expenditures of \$59.1 million were incurred during Q1 2021. In Canada, \$54.3 million was incurred primarily related to drilling and completions activity where we drilled ten (9.7 net) Mannville wells and completed 15.0 (14.7 net) Mannville wells.
- In our International core region, capital expenditures of \$24.3 million were incurred during Q1 2021. Our activities internationally included the drilling of 1.0 (0.5 net) wells in the Netherlands.

Sustainability review

Free cash flow

- Free cash flow increased by \$142.2 million from Q1 2020 to Q1 2021 mainly due to lower capital spending in Q1 2021 as a result of a more level-loaded drilling program in our North America core region.

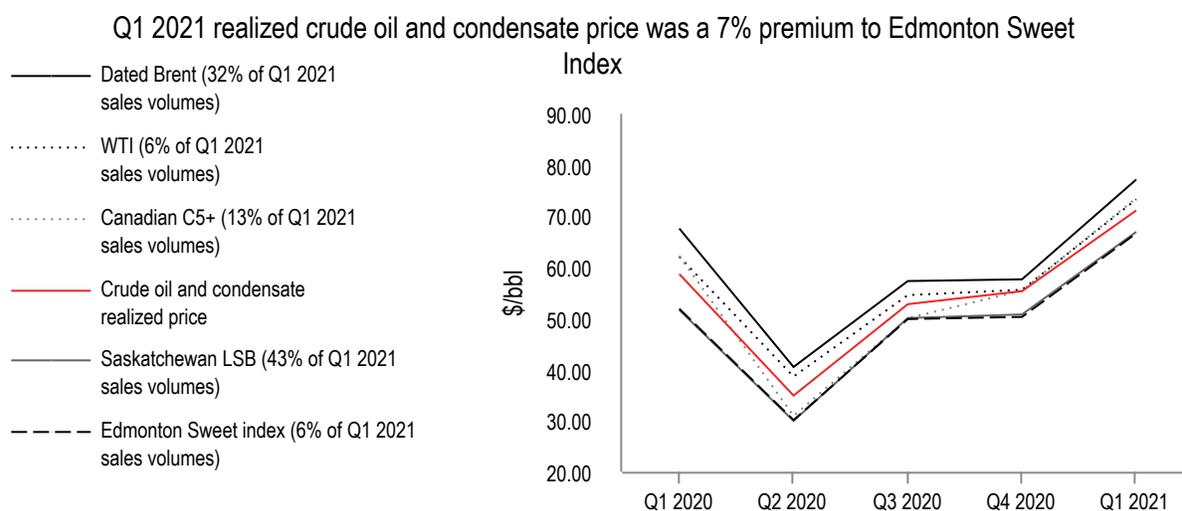

Long-term debt and net debt

- Long-term debt remained consistent at \$1.9 billion as at March 31, 2021 from December 31, 2020.
- Net debt decreased to \$2.0 billion as at March 31, 2021 from \$2.1 billion as at December 31, 2020, mainly due to a decrease in net working capital driven by higher accounts receivable and the change in the mark-to-market position of our equity swap position moving into long-term liabilities as the term was extended.
- The ratio of net debt to four quarter trailing fund flows from operations decreased to 4.04 as at March 31, 2021 (December 31, 2020 - 4.19) mainly due to lower net debt combined with relatively consistent four quarter trailing fund flows from operations.

Benchmark Commodity Prices

	Q1 2021	Q1 2020	Q1/21 vs. Q1/20
Crude oil			
WTI (\$/bbl)	73.27	62.06	18%
WTI (US \$/bbl)	57.84	46.17	25%
Edmonton Sweet index (\$/bbl)	66.63	51.87	29%
Edmonton Sweet index (US \$/bbl)	52.60	38.59	36%
Saskatchewan LSB index (\$/bbl)	66.91	51.63	30%
Saskatchewan LSB index (US \$/bbl)	52.82	38.41	38%
Canadian C5+ Condensate index (\$/bbl)	73.53	62.21	18%
Canadian C5+ Condensate index (US \$/bbl)	58.04	46.28	25%
Dated Brent (\$/bbl)	77.15	67.56	14%
Dated Brent (US \$/bbl)	60.90	50.26	21%
Natural gas			
AECO (\$/mcf)	3.15	2.03	55%
NBP (\$/mcf)	8.70	4.32	101%
NBP (€/mcf)	5.69	2.92	95%
TTF (\$/mcf)	8.27	4.23	96%
TTF (€/mcf)	5.41	2.85	90%
Henry Hub (\$/mcf)	3.41	2.62	30%
Henry Hub (US \$/mcf)	2.69	1.95	38%
Average exchange rates			
CDN \$/US \$	1.27	1.34	(5)%
CDN \$/Euro	1.53	1.48	3%
Realized prices			
Crude oil and condensate (\$/bbl)	71.09	58.66	21%
NGLs (\$/bbl)	29.39	8.92	230%
Natural gas (\$/mcf)	5.51	2.94	87%
Total (\$/boe)	49.20	36.35	35%

As an internationally diversified producer, we are exposed to a range of commodity prices. In our North America core region, our crude oil is sold at benchmarks linked to WTI (including the Edmonton Sweet index, the Saskatchewan LSB index, and the Canadian C5+ index) and our natural gas is sold at the AECO index (in Canada) or the Henry Hub index (in the United States). In our International core region, our crude oil is sold with reference to Dated Brent and our natural gas is sold with reference to NBP, TTF, or indices highly correlated to TTF.

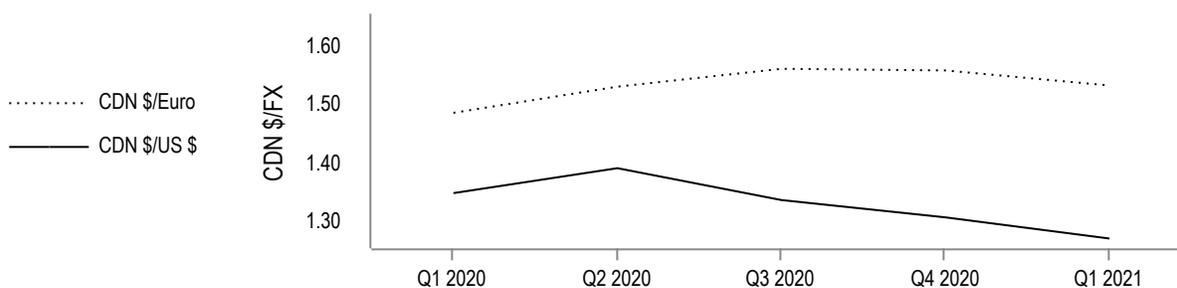

- Crude oil prices increased in Q1 2021 relative to Q1 2020 due to continued global demand recovery, a coordinated supply cut from the OPEC+ group, and lower US shale production. Year-over-year, Canadian dollar WTI and Brent prices rose 18% and 14% respectively.
- In Canadian dollar terms, year-over-year, the Edmonton Sweet differential increased by \$3.55/bbl to a discount of \$6.64/bbl against WTI, and the Saskatchewan LSB differential increased by \$4.07/bbl to a discount of \$6.36/bbl against WTI.
- Approximately 32% of Vermilion's Q1 2021 crude oil and condensate production was priced at the Dated Brent index (which averaged a premium to WTI of US\$3.06/bbl), while the remainder of our crude oil and condensate production was priced at the Saskatchewan LSB, Canadian C5+, Edmonton Sweet, and WTI indices.

Q1 2021 realized natural gas price was a \$2.36/mcf premium to AECO

- In Canadian dollar terms, prices for European natural gas (TTF and NBP) rose by 96% and 101%, respectively, in Q1 2021 compared to Q1 2020. Seasonal demand in Europe drove domestic natural gas prices higher, and a shortage of LNG cargoes in Asia led to highly competitive pricing for European imports.
- Natural gas prices at AECO in Q1 2021 increased by 55% compared to Q1 2020, with seasonal demand and supportive storage balances improving prices.
- For Q1 2021, average European natural gas prices represented a \$5.34/mcf premium to AECO. Approximately 38% of our natural gas production in Q1 2021 benefited from this premium European pricing.

Quarter-over-quarter, the Canadian dollar strengthened versus the Euro and US Dollar

- For the three months ended March 31, 2021, the Canadian dollar strengthened 2% against the Euro quarter-over-quarter.
- For the three months ended March 31, 2021, the Canadian dollar strengthened 3% against the US dollar quarter-over-quarter.

North America

	Q1 2021	Q1 2020
Production⁽¹⁾		
Crude oil and condensate (bbls/d)	24,645	29,888
NGLs (bbls/d)	8,074	8,022
Natural gas (mmcf/d)	144.36	157.88
Total production volume (boe/d)	56,780	64,222

⁽¹⁾ Please refer to Supplemental Table 4 "Production" for disclosure by product type.

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
Sales	220,134	43.08	170,791	29.22
Royalties	(28,080)	(5.49)	(20,701)	(3.54)
Transportation	(10,484)	(2.05)	(11,138)	(1.91)
Operating	(57,281)	(11.21)	(69,734)	(11.93)
General and administration ⁽¹⁾	(6,848)	(1.34)	(4,938)	(0.84)
Corporate income tax (expense) ⁽¹⁾	(214)	(0.04)	(232)	(0.04)
Fund flows from operations	117,227	22.94	64,048	10.96
Capital expenditures	(59,113)		(197,926)	
Free cash flow	58,114		(133,878)	

⁽¹⁾ Includes amounts from Corporate segment.

In North America, production averaged 56,780 in Q1 2021, a decrease of 12% year-over-year primarily due to natural decline and a reduced capital program.

Following a relatively inactive second half of 2020, we recommenced our North American drilling campaign in Q4 2020 and accelerated the program through Q1 2021. The Q1 2021 program was focused on drilling condensate-rich Mannville natural gas wells in west-central Alberta. We drilled ten (9.7 net) Mannville wells and completed 15 (14.7 net) Mannville wells during the first quarter, of which 13 (13.0 net) wells were brought on production during the quarter. The remaining wells will be brought on production in Q2 2021. During the first quarter, our United States business unit focused on well optimization work and preparation activities in advance of the four (3.9 net) well drilling program planned for Q2 2021.

Sales

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
Canada	195,808	41.51	154,963	28.60
United States	24,326	61.81	15,828	37.12
North America	220,134	43.08	170,791	29.22

Sales in North America increased on a dollar and per unit basis for the three months ended March 31, 2021 versus the comparable prior period due to higher benchmark prices across all products, partially offset by lower production volumes.

Royalties

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
Canada	(21,774)	(4.62)	(16,685)	(3.08)
United States	(6,306)	(16.02)	(4,016)	(9.42)
North America	(28,080)	(5.49)	(20,701)	(3.54)

Royalties in North America increased for the three months ended March 31, 2021 versus the same period in the prior year primarily due to higher benchmark prices. Royalties as a percentage of sales of 12.8% remained relatively consistent versus the same period in the prior year.

Transportation

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
Canada	(10,236)	(2.17)	(11,138)	(2.06)
United States	(248)	(0.63)	—	—
North America	(10,484)	(2.05)	(11,138)	(1.91)

Transportation expense in North America decreased versus the comparable prior period due to lower production volumes in the Canada business unit. On a per unit basis, transportation expense remained relatively consistent versus the comparable prior period.

Operating expense

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
Canada	(53,166)	(11.27)	(64,185)	(11.85)
United States	(4,115)	(10.46)	(5,549)	(13.01)
North America	(57,281)	(11.21)	(69,734)	(11.93)

Operating expenses in North America for the three months ended March 31, 2021 decreased by 17.9% versus the comparable prior period primarily due to cost reduction initiatives combined with lower production volumes.

International

	Q1 2021	Q1 2020
Production ⁽¹⁾		
Crude oil and condensate (bbls/d)	14,560	14,994
Natural gas (mmcf/d)	89.62	107.63
Total production volume (boe/d)	29,495	32,932
Total sales volume (boe/d)	26,357	35,028

⁽¹⁾ Please refer to Supplemental Table 4 "Production" for disclosure by product type.

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
Sales	148,003	62.39	157,523	49.42
Royalties	(8,366)	(3.53)	(10,424)	(3.27)
Transportation	(6,537)	(2.76)	(6,192)	(1.94)
Operating	(38,960)	(16.42)	(51,404)	(16.13)
General and administration	(4,882)	(2.06)	(8,379)	(2.63)
Corporate income tax recovery (expense)	1,559	0.66	(342)	(0.11)
PRRT	(1,414)	(0.60)	(9,256)	(2.90)
Fund flows from operations	89,403	37.69	71,526	22.44
Capital expenditures	(24,250)		(35,778)	
Free cash flow	65,153		35,748	

Production from our International assets averaged 29,496 in Q1 2021, representing a decrease of 10% year-over-year primarily due to natural decline and minimal capital activity through the second half of 2020.

We drilled three wells in Europe during the first quarter, comprised of one (0.5 net) well in the Netherlands, one (1.0 net) well in Hungary and one (1.0 net) well in Croatia. In the Netherlands, we successfully drilled the Blesdijke natural gas well (0.5 net) and encountered 38 meters of combined net pay from three separate formations (Vlieland, Zechstein and Rotliegend). The well was completed subsequent to the end of the first quarter and we expect to bring production on from the Vlieland and Zechstein later this year. The two (2.0 net) wells drilled in Central and Eastern European did not encounter commercial hydrocarbons and were subsequently plugged and abandoned.

Sales

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
Australia	27,382	94.50	51,995	96.66
France	51,529	77.19	56,789	61.08
Netherlands	28,551	45.28	19,603	26.45
Germany	13,095	49.82	10,469	34.70
Ireland	27,068	52.85	17,588	28.03
Central and Eastern Europe	378	39.51	1,079	21.48
International	148,003	62.39	157,523	49.42

As a result of changes in inventory levels, our sales volumes for crude oil in Australia, France, and Germany may differ from our production volumes in those business units. The following table provides the crude oil sales volumes (consisting entirely of "light crude oil and medium crude oil") for those jurisdictions.

Crude oil sales volumes (bbls/d)	Q1 2021	Q1 2020
Australia	3,219	5,911
France	7,417	10,217
Germany	687	875

Sales decreased by \$9.5 million in Q1 2021 versus Q1 2020 mainly from lower sales in Australia and France primarily as a result of a crude oil inventory build of 262,000 bbls during the first quarter of 2021. This was partially offset by increased sales across our European business units as a result of higher realized prices driven by higher year-over-year commodity prices. This higher pricing across Europe was partially offset by lower sales volumes driven by natural decline.

Royalties

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
France	(7,236)	(10.84)	(9,040)	(9.72)
Netherlands	(97)	(0.15)	(143)	(0.19)
Germany	(955)	(3.63)	(942)	(3.12)
Central and Eastern Europe	(78)	(8.15)	(299)	(5.93)
International	(8,366)	(3.53)	(10,424)	(3.27)

Royalties in our International core region are primarily incurred in France, where royalties include charges based on a percentage of sales and fixed per boe charges. Our production in Australia and Ireland is not subject to royalties.

Royalties decreased in our International core region in Q1 2021 versus Q1 2020 mainly due to lower production in France. Royalties as a percentage of sales of 5.7% in Q1 2021 decreased from 6.6% in Q1 2020 mainly due to lower RCDM royalties in France which are levied on units of production and not subject to changes in commodity prices.

Transportation

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
France	(4,405)	(6.60)	(3,725)	(4.01)
Germany	(1,021)	(3.88)	(1,322)	(4.38)
Ireland	(1,111)	(2.17)	(1,145)	(1.82)
International	(6,537)	(2.76)	(6,192)	(1.94)

Transportation expense remained relatively consistent for Q1 2021 versus Q1 2020. Increased Q1 2021 costs in France relate to the use of incremental trucking in the Paris Basin following the conversion of the Grandpuits refinery, and was partially offset by decreased costs in Germany related to lower sales volumes and the timing of prior period adjustments.

Our production in Australia, Netherlands and Central and Eastern Europe is not subject to transportation expense.

Operating expense

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
Australia	(9,738)	(33.61)	(17,373)	(32.30)
France	(11,791)	(17.66)	(15,899)	(17.10)
Netherlands	(7,411)	(11.75)	(8,915)	(12.03)
Germany	(6,302)	(23.97)	(4,915)	(16.29)
Ireland	(3,657)	(7.14)	(4,212)	(6.71)
Central and Eastern Europe	(61)	(6.38)	(90)	(1.79)
International	(38,960)	(16.42)	(51,404)	(16.13)

Operating expenses for Q1 2021 decreased by \$12.4 million compared to Q1 2020. This decrease primarily resulted from an inventory build in Australia and France where operating expenses are deferred on the balance sheet until crude oil is sold at which point the related expenses are recognized into income.

Operating expenses remained relatively consistent on a per boe basis for Q1 2021 versus Q1 2020.

Consolidated Financial Performance Review

Fund flows from operations

	Q1 2021		Q1 2020	
	\$M	\$/boe	\$M	\$/boe
Sales	368,137	49.20	328,314	36.35
Royalties	(36,446)	(4.87)	(31,125)	(3.45)
Transportation	(17,021)	(2.27)	(17,330)	(1.92)
Operating	(96,241)	(12.86)	(121,138)	(13.41)
General and administration	(11,730)	(1.57)	(13,317)	(1.47)
Corporate income tax recovery (expense)	1,345	0.18	(574)	(0.06)
PRRT	(1,414)	(0.19)	(9,256)	(1.02)
Interest expense	(19,235)	(2.57)	(19,982)	(2.21)
Realized (loss) gain on derivatives	(25,633)	(3.43)	49,419	5.47
Realized foreign exchange (loss) gain	(5,181)	(0.69)	8,523	0.94
Realized other income (expense)	5,470	0.73	(3,309)	(0.37)
Fund flows from operations	162,051	21.66	170,225	18.85

Fluctuations in fund flows from operations may occur as a result of changes in production levels, commodity prices, and costs to produce petroleum and natural gas. In addition, fund flows from operations may be affected by the timing of crude oil shipments in Australia and France. When crude oil inventory is built up, the related operating expense, royalties, and depletion expense are deferred and carried as inventory on the consolidated balance sheet. When the crude oil inventory is subsequently drawn down, the related expenses are recognized.

General and administration

- General and administration expense decreased by 12% in Q1 2021 versus Q1 2020 primarily due to work-force reductions made in 2020.

PRRT and corporate income taxes

- PRRT decreased in Q1 2021 versus Q1 2020 due to lower sales.
- Corporate income taxes in Q1 2021 versus Q1 2020 decreased mainly due to the recovery of prior year taxes resulting from current year tax losses in Australia.

Interest expense

- Interest expense remained relatively consistent between Q1 2021 and Q1 2020.

Realized gain or loss on derivatives

- Realized gains on derivatives relate to receipts for European natural gas and crude oil hedges. In Q1 2021, we recorded \$25.6 million of realized losses on our crude oil and natural gas prices due to higher pricing compared to the strike prices on our hedges. This compares to \$49.4 million of realized gains in Q1 2020 resulting from lower commodity prices relative to the strike prices on our hedges as well as amounts received on cross currency interest rate swaps.
- A listing of derivative positions as at March 31, 2021 is included in "Supplemental Table 2" of this MD&A.

Realized other income

- Realized other income for Q1 2021 primarily relates to amounts for funding under the Saskatchewan Accelerated Site Closure program to complete abandonment and reclamation on inactive oil and gas wells and facilities. Realized other expense for Q1 2020 relates primarily to amounts uncertain to be received pursuant to a negotiated settlement of a legal matter.

Net earnings

The following table shows a reconciliation from fund flows from operations to net earnings (loss):

(\$M)	Q1 2021	Q1 2020
Fund flows from operations	162,051	170,225
Equity based compensation	(16,540)	(12,997)
Unrealized gain on derivative instruments	5,442	9,316
Unrealized foreign exchange loss	(25,910)	(9,982)
Accretion	(10,507)	(9,738)
Depletion and depreciation	(106,013)	(157,807)
Deferred tax (expense) recovery	(171,228)	257,542
Impairment reversal (expense)	662,866	(1,564,854)
Unrealized other expense	(197)	(209)
Net earnings (loss)	499,964	(1,318,504)

Fluctuations in net earnings from period-to-period are caused by changes in both cash and non-cash based income and charges. Cash based items are reflected in fund flows from operations. Non-cash items include: equity based compensation expense, unrealized gains and losses on derivative instruments, unrealized foreign exchange gains and losses, accretion, depletion and depreciation expense, and deferred taxes. In addition, non-cash items may also include gains resulting from business combinations or charges resulting from impairment or impairment reversals.

Equity based compensation

Equity based compensation expense relates primarily to non-cash compensation expense attributable to long-term incentives granted to directors, officers, and employees under security-based arrangements. Equity based compensation expense increased in Q1 2021 versus Q1 2020 primarily due to settlement of bonuses in Q1 2021 under the employee bonus plan.

Unrealized gain or loss on derivative instruments

Unrealized gain or loss on derivative instruments arise as a result of changes in forecasts for future prices and rates. As Vermilion uses derivative instruments to manage the commodity price exposure of our future crude oil and natural gas production, we will normally recognize unrealized gains on derivative instruments when future commodity price forecasts decline and vice-versa. As derivative instruments are settled, the unrealized gain or loss previously recognized is reversed, and the settlement results in a realized gain or loss on derivative instruments.

USD-to-CAD cross currency interest rate swaps and foreign exchange swaps may be entered into to hedge the foreign exchange movements on USD borrowings on our revolving credit facility. As such, unrealized gains and losses on our cross currency interest swaps are offset by unrealized losses and gains on foreign exchange relating to the underlying USD borrowings from our revolving credit facility.

For the three months ended March 31, 2021, we recognized a net unrealized gain on derivative instruments of \$5.4 million. This consists of a \$20.0 million unrealized gain on our USD-to-CAD foreign exchange swaps and a \$12.9 million unrealized gain from our equity swaps. These unrealized gains are partially offset by unrealized losses of \$13.0 million on our European natural gas commodity derivative instruments, \$10.6 million on our crude oil commodity derivative instruments and \$3.9 million on our North American natural gas commodity derivative instruments.

Unrealized foreign exchange gains or losses

As a result of Vermilion's international operations, Vermilion has monetary assets and liabilities denominated in currencies other than the Canadian dollar. These monetary assets and liabilities include cash, receivables, payables, long-term debt, derivative instruments and intercompany loans. Unrealized foreign exchange gains and losses result from translating these monetary assets and liabilities from their underlying currency to the Canadian dollar.

In 2021, unrealized foreign exchange gains and losses primarily resulted from:

- The translation of Euro denominated intercompany loans from Vermilion Energy Inc. to our international subsidiaries. An appreciation in the Euro against the Canadian dollar will result in an unrealized foreign exchange gain (and vice-versa). Under IFRS, the offsetting foreign exchange loss or gain is recorded as a currency translation adjustment within other comprehensive income. As a result, consolidated comprehensive income reflects the offsetting of these translation adjustments while net earnings reflects only the parent company's side of the translation.
- The translation of USD borrowings on our revolving credit facility. The unrealized foreign exchange gains or losses on these borrowings are offset by unrealized derivative gains or losses on associated USD-to-CAD cross currency interest rate swaps (discussed further below).
- The translation of our USD denominated senior unsecured notes prior to June 12, 2019 and from May 5, 2020 onward. During the period between June 12, 2019 and May 5, 2020 the USD senior notes were hedged by a USD-to-CAD cross currency interest rate swap. Subsequent

to the termination of these instruments, amounts previously recognized in the hedge accounting reserve will be recognized into earnings through unrealized foreign exchange loss over the period of the hedged cash flows.

For the three months ended March 31, 2021, we recognized a net unrealized foreign exchange loss of \$25.9 million due to an unrealized loss of \$23.0 million on our USD borrowings from our revolving credit facility and \$7.5 million on intercompany loans due to the Euro weakening 5.0% against the Canadian dollar in Q1 2021. These were partially offset by the impact of the US dollar weakening 1.2% against the Canadian dollar in Q1 2021 resulting in an unrealized gain of \$4.6 million on our senior unsecured notes.

As at March 31, 2021, a \$0.01 appreciation of the Euro against the Canadian dollar would result in a \$0.9 million increase to net earnings as a result of an unrealized gain on foreign exchange. In contrast, a \$0.01 appreciation of the US dollar against the Canadian dollar would result in a \$2.9 million decrease to net earnings as a result of an unrealized loss on foreign exchange.

Accretion

Accretion expense is recognized to update the present value of the asset retirement obligation balance. For Q1 2021 versus Q1 2020 accretion expense increased primarily due to additional obligations recognized at the end of 2020 partially offset by the weakening of the Euro against the Canadian dollar.

Depletion and depreciation

Depletion and depreciation expense is recognized to allocate the cost of capital assets over the useful life of the respective assets. Depletion and depreciation expense per unit of production is determined for each depletion unit (which are groups of assets within a specific production area that have similar economic lives) by dividing the sum of the net book value of capital assets and future development costs by total proved plus probable reserves.

Fluctuations in depletion and depreciation expense are primarily the result of changes in produced crude oil and natural gas volumes, and changes in depletion and depreciation per unit. Fluctuations in depletion and depreciation per unit are the result of changes in reserves, depletable base (net book value of capital assets and future development costs), and relative production mix.

Depletion and depreciation on a per boe basis for Q1 2021 of \$14.17 decreased from \$17.47 in Q1 2020 primarily due to impairment charges taken in 2020.

Deferred tax

Deferred tax assets arise when the tax basis of an asset exceeds its accounting basis (known as a deductible temporary difference). Conversely, deferred tax liabilities arise when the tax basis of an asset is less than its accounting basis (known as a taxable temporary difference). Deferred tax assets are recognized only to the extent that it is probable that there are future taxable profits against which the deductible temporary difference can be utilized. Deferred tax assets and liabilities are measured at the enacted or substantively enacted tax rate that is expected to apply when the asset is realized, or the liability is settled.

As such, fluctuations in deferred tax expenses and recoveries primarily arise as a result of: changes in the accounting basis of an asset or liability without a corresponding tax basis change (e.g. when derivative assets and liabilities are marked-to-market or when accounting depletion differs from tax depletion), changes in available tax losses (e.g. if they are utilized to offset taxable income), changes in estimated future taxable profits resulting in a derecognition or recognition of deferred tax assets, and changes in enacted or substantively enacted tax rates.

For the three months ended March 31, 2021, a deferred tax expense was recognized of \$171.2 million compared to deferred tax recovery of \$257.5 million for the three months ended March 31, 2020 due to impairment charges in both periods.

Impairment

Impairment losses are recognized when indicators of impairment arise and the carrying amount of a cash generating unit ("CGU") exceeds its recoverable amount, determined as the higher of fair value less costs of disposal or value-in-use.

In the first quarter of 2021, indicators of impairment reversal were present in our Australia, Alberta, Saskatchewan, and United States CGUs due to an increase and stabilization in forecast crude oil prices versus 2020 when impairment charges were taken. As a result of the indicators of impairment reversal, the Company performed impairment reversal tests on the identified CGUs and the recoverable amounts were determined using fair value less costs to sell, which considered future after-tax cash flows from proved plus probable reserves and an after-tax discount rate of 12.0%. Based on the results of the impairment tests completed, recoverable amounts were determined to be greater than the carrying values of the CGUs tested and \$492.2 million (net of \$170.7 million deferred income tax expense) of impairment reversal was recorded.

In the first quarter of 2020, indicators of impairment were present due to global commodity price forecasts deteriorating from decreases in demand and an increase of supply around the world. As a result of the indicators of impairment, the Company performed impairment tests across all CGUs. The recoverable amounts were determined using fair value less costs to sell, which considered future after-tax cash flows from proved plus probable reserves and an after-tax discount rate of 11.5%. Based on the results of the impairment tests completed, the Company recognized non-cash impairment charges of \$1.2 billion (net of \$0.4 billion income tax recovery).

Financial Position Review

Balance sheet strategy

We regularly review whether our forecast of fund flows from operations is sufficient to finance planned capital expenditures, and abandonment and reclamation expenditures. To the extent that fund flows from operations forecasts are not expected to be sufficient to fulfill such expenditures, we will evaluate our ability to finance any shortfall by reducing some or all categories of expenditures, with issuances of equity, or with debt (including borrowing using the unutilized capacity of our existing revolving credit facility). We have a long-term goal of achieving and maintaining a ratio of net debt to fund flows from operations of less than 1.5.

As at March 31, 2021, we have a ratio of net debt to fund flows from operations of 4.04. We will continue to monitor for changes in forecasted fund flows from operations and, as appropriate, will adjust our exploration and development capital plans (and associated growth targets) to minimize any further increase to debt. As commodity prices improve, we intend to strengthen our balance sheet through the reduction of debt.

Net debt

Net debt is reconciled to long-term debt, as follows:

(\$M)	As at	
	Mar 31, 2021	Dec 31, 2020
Long-term debt	1,911,466	1,933,848
Current liabilities	385,253	433,128
Current assets	(300,044)	(260,993)
Net debt	1,996,675	2,105,983
Ratio of net debt to four quarter trailing fund flows from operations	4.04	4.19

As at March 31, 2021, net debt decreased to \$2.0 billion (December 31, 2020 - \$2.1 billion) due to free cash flow generated in Q1 2021 of \$78.7 million. We will draw on unutilized capacity of the revolving credit facility to fund working capital deficiencies. The ratio of net debt to four quarter trailing fund flows from operations decreased to 4.04 (December 31, 2020 - 4.19) mainly due to the decrease in net debt combined with relatively consistent four quarter trailing fund flows from operations.

Long-term debt

The balances recognized on our balance sheet are as follows:

(\$M)	As at	
	Mar 31, 2021	Dec 31, 2020
Revolving credit facility	1,537,158	1,555,215
Senior unsecured notes	374,308	378,633
Long-term debt	1,911,466	1,933,848

Revolving Credit Facility

As at March 31, 2021, Vermilion had in place a bank revolving credit facility maturing May 31, 2024 with terms and outstanding positions as follows:

(\$M)	As at	
	Mar 31, 2021	Dec 31, 2020
Total facility amount	2,100,000	2,100,000
Amount drawn	(1,537,158)	(1,555,215)
Letters of credit outstanding	(23,013)	(23,210)
Unutilized capacity	539,829	521,575

As at March 31, 2021, the revolving credit facility was subject to the following financial covenants:

Financial covenant	Limit	As at	
		Mar 31, 2021	Dec 31, 2020
Consolidated total debt to consolidated EBITDA	Less than 4.0	3.51	3.48
Consolidated total senior debt to consolidated EBITDA	Less than 3.5	2.84	2.82
Consolidated EBITDA to consolidated interest expense	Greater than 2.5	7.93	8.12

Our financial covenants include financial measures defined within our revolving credit facility agreement that are not defined under IFRS. These financial measures are defined by our revolving credit facility agreement as follows:

- Consolidated total debt: Includes all amounts classified as "Long-term debt", "Current portion of long-term debt", and "Lease obligations" (including the current portion included within "Accounts payable and accrued liabilities" but excluding operating leases as defined under IAS 17) on our balance sheet.
- Consolidated total senior debt: Defined as consolidated total debt excluding unsecured and subordinated debt.
- Consolidated EBITDA: Defined as consolidated net earnings before interest, income taxes, depreciation, accretion and certain other non-cash items, adjusted for the impact of the acquisition of a material subsidiary.
- Total interest expense: Includes all amounts classified as "Interest expense", but excludes interest on operating leases as defined under IAS 17.

In addition, our revolving credit facility has provisions relating to our liability management ratings in Alberta and Saskatchewan whereby if our security adjusted liability management ratings fall below specified limits in a province, a portion of the asset retirement obligations are included in the definitions of consolidated total debt and consolidated total senior debt. An event of default occurs if our security adjusted liability management ratings breach additional lower limits for a period greater than 90 days. As of March 31, 2021, Vermilion's liability management ratings were higher than the specified levels, and as such, no amounts relating to asset retirement obligations were included in the calculation of consolidated total debt and consolidated total senior debt.

Senior Unsecured Notes

On March 13, 2017, Vermilion issued US \$300.0 million of senior unsecured notes at par. The notes bear interest at a rate of 5.625% per annum, paid semi-annually on March 15 and September 15, and mature on March 15, 2025. As direct senior unsecured obligations of Vermilion, the notes rank equally in right of payment with existing and future senior indebtedness of the Company.

The senior unsecured notes were recognized at amortized cost and include the transaction costs directly related to the issuance.

Vermilion may redeem some or all of the senior unsecured notes at the redemption prices set forth in the following table plus any accrued and unpaid interest, if redeemed during the twelve-month period beginning on March 15 of each of the years indicated below:

Year	Redemption price
2021	102.813 %
2022	101.406 %
2023 and thereafter	100.000 %

Shareholders' capital

The following table outlines our dividend payment history:

Date	Monthly dividend per unit or share
January 2003 to December 2007	\$0.170
January 2008 to December 2012	\$0.190
January 2013 to December 2013	\$0.200
January 2014 to March 2018	\$0.215
April 2018 to February 2020	\$0.230
March 2020	\$0.115

In April 2020, we suspended our monthly dividend to strengthen the financial position of the Company. Our ability to restore a dividend will be dependent upon stronger commodity prices combined with a balance sheet that reflects the Company's ability to sustain such dividend over the long-term.

The following table reconciles the change in shareholders' capital:

Shareholders' Capital	Number of Shares ('000s)	Amount (\$M)
Balance at December 31, 2020	158,724	4,181,160
Equity based compensation	625	5,715
Balance at March 31, 2021	159,349	4,186,875

As at March 31, 2021, there were approximately 6.2 million equity based compensation awards outstanding. As at April 28, 2021, there were approximately 161.7 million common shares issued and outstanding.

Asset Retirement Obligations

As at March 31, 2021, asset retirement obligations were \$596.2 million compared to \$467.7 million as at December 31, 2020. The increase in asset retirement obligations is primarily attributable to a decrease in the credit-adjusted risk-free rate from December 31, 2020 to March 31, 2021. This increase in asset retirement obligations was partially offset by the Euro weakening against the Canadian dollar and obligations settled.

The present value of the obligation is calculated using a credit-adjusted risk-free rate, calculated using a credit spread added to risk-free rates based on long-term, risk-free government bonds. Vermilion's credit spread is determined as the yield to maturity on its senior unsecured notes as at the reporting period.

The risk-free rates and credit spread used as inputs to discount the obligations were as follows:

	Mar 31, 2021	Dec 31, 2020	Change
Credit spread added to below noted risk-free rates	6.8 %	9.5 %	(2.7)%
Country specific risk-free rate			
Canada	1.9 %	1.2 %	0.7 %
United States	2.3 %	1.6 %	0.7 %
France	0.6 %	0.3 %	0.3 %
Netherlands	(0.5)%	(0.6)%	0.1 %
Germany	0.2 %	(0.2)%	0.4 %
Ireland	0.3 %	(0.1)%	0.4 %
Australia	2.0 %	1.3 %	0.7 %

Risks and Uncertainties

Vermilion is exposed to various market and operational risks. For a discussion of these risks, please see Vermilion's MD&A and Annual Information Form, each for the year ended December 31, 2020 available on SEDAR at www.sedar.com or on Vermilion's website at www.vermilionenergy.com.

Critical Accounting Estimates

The preparation of financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect reported assets, liabilities, revenues and expenses, gains and losses, and disclosures of any possible contingencies. These estimates and assumptions are developed based on the best available information which management believed to be reasonable at the time such estimates and assumptions were made. As such, these assumptions are uncertain at the time estimates are made and could change, resulting in a material impact on Vermilion's consolidated financial statements. Estimates are reviewed by management on an ongoing basis and as a result may change from period to period due to the availability of new information or changes in circumstances. Additionally, as a result of the unique circumstances of each jurisdiction that Vermilion operates in, the critical accounting estimates may affect one or more jurisdictions. There have been no material changes to our critical accounting estimates used in applying accounting policies for the three months ended March 31, 2021. Further information, including a discussion of critical accounting estimates, can be found in the notes to the Consolidated Financial Statements and annual MD&A for the year ended December 31, 2020, available on SEDAR at www.sedar.com or on Vermilion's website at www.vermilionenergy.com.

Off Balance Sheet Arrangements

We have not entered into any guarantee or off balance sheet arrangements that would materially impact our financial position or results of operations.

Internal Control Over Financial Reporting

Other than Vermilion's response to COVID-19, there has been no change in Vermilion's internal control over financial reporting ("ICFR") during the period covered by this MD&A that materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

As a result of COVID-19, our global workforce shifted to a primarily work from home environment beginning in March 2020. This change to remote working was rapid and included both our employees as well as a large extended workforce across all regions in which we operate. While pre-existing controls were not specifically designed to operate in our current work from home operating environment, we believe that our internal controls over financial reporting continue to be effective. We took precautionary actions to re-evaluate and refine our financial reporting process to provide reasonable assurance that we could report our financial results accurately and timely.

Recently Adopted Accounting Pronouncements

Vermilion did not adopt any new accounting pronouncements as at March 31, 2021.

Disclosure Controls and Procedures

Our officers have established and maintained disclosure controls and procedures and evaluated the effectiveness of these controls in conjunction with our filings.

As of March 31, 2021, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, the President, for this specific purpose of acting in the capacity of Chief Executive Officer, and Chief Financial Officer have concluded and certified that our disclosure controls and procedures are effective.

Supplemental Table 1: Netbacks

The following table includes financial statement information on a per unit basis by business unit. Liquids includes crude oil, condensate, and NGLs. Natural gas sales volumes have been converted on a basis of six thousand cubic feet of natural gas to one barrel of oil equivalent.

	Q1 2021			Q1 2020		
	Liquids \$/bbl	Natural Gas \$/mcf	Total \$/boe	Liquids \$/bbl	Natural Gas \$/mcf	Total \$/boe

⁽¹⁾ Vermilion considers Australian PRRT to be an operating item and, accordingly, has included PRRT in the calculation of operating netbacks. Current income taxes presented above excludes PRRT.

Supplemental Table 2: Hedges

The prices in these tables may represent the weighted averages for several contracts with foreign currency amounts translated to the disclosure currency using forward rates as at the month-end date. The weighted average price for the portfolio of options listed below may not have the same payoff profile as the individual contracts. As such, the presentation of the weighted average prices is purely for indicative purposes.

The following tables outline Vermilion's outstanding risk management positions as at March 31, 2021:

	Unit	Currency	Daily Bought Put Volume	Weighted Average Bought Put Price	Daily Sold Call Volume	Weighted Average Sold Call Price	Daily Sold Put Volume	Weighted Average Sold Put Price	Daily Sold Swap Volume	Weighted Average Sold Swap Price	Daily Bought Swap Volume	Weighted Average Bought Swap Price

⁽¹⁾ Under National Instrument 51-101 "Standards of Disclosure for Oil and Gas Activities", disclosure of production volumes should include segmentation by product type as defined in the instrument. This table provides a reconciliation from "crude oil and condensate", "NGLs" and "natural gas" to the product types. In this report, references to "crude oil" and "light and medium crude oil" mean "light crude oil and medium crude oil" and references to "natural gas" mean "conventional natural gas". Production volumes reported are based on quantities as measured at the first point of sale.

Non-GAAP Financial Measures

This MD&A includes references to certain financial measures which do not have standardized meanings and may not be comparable to similar measures presented by other issuers. These financial measures include fund flows from operations, a measure of profit or loss in accordance with IFRS 8 “Operating Segments” (please see Segmented Information in the Notes to the Condensed Consolidated Interim Financial Statements) and net debt, a measure of capital in accordance with IAS 1 “Presentation of Financial Statements” (please see Capital Disclosures in the Notes to the Condensed Consolidated Interim Financial Statements).

In addition, this MD&A includes financial measures which are not specified, defined, or determined under IFRS and are therefore considered non-GAAP financial measures and may not be comparable to similar measures presented by other issuers. These non-GAAP financial measures include:

Acquisitions: The sum of acquisitions from the Consolidated Statements of Cash Flows, Vermilion common shares issued as consideration, the estimated value of contingent consideration, the amount of acquiree's outstanding long-term debt assumed plus or net of acquired working capital deficit or surplus. We believe that including these components provides a useful measure of the economic investment associated with our acquisition activity.

Capital expenditures: The sum of drilling and development and exploration and evaluation from the Consolidated Statements of Cash Flows. We consider capital expenditures to be a useful measure of our investment in our existing asset base. Capital expenditures are also referred to as E&D capital.

Cash dividends per share: Represents cash dividends declared per share and is a useful measure of the dividends a common shareholder was entitled to during the period.

Covenants: The financial covenants on our revolving credit facility contain non-GAAP measures. The definitions for these financial covenants are included in Financial Position Review.

Diluted shares outstanding: The sum of shares outstanding at the period end plus outstanding awards under the VIP, based on current estimates of future performance factors and forfeiture rates.

Free cash flow: Represents fund flows from operations in excess of capital expenditures. We use free cash flow to determine the funding available for investing and financing activities, including payment of dividends, repayment of long-term debt, reallocation to existing business units, and deployment into new ventures. We also assess free cash flow as a percentage of fund flows from operations, which is a measure of the percentage of fund flows from operations that is retained for incremental investing and financing activities.

Fund flows from operations per basic and diluted share: Management assesses fund flows from operations on a per share basis as we believe this provides a measure of our operating performance after taking into account the issuance and potential future issuance of Vermilion common shares. Fund flows from operations per basic share is calculated by dividing fund flows from operations by the basic weighted average shares outstanding as defined under IFRS. Fund flows from operations per diluted share is calculated by dividing fund flows from operations by the sum of basic weighted average shares outstanding and incremental shares issuable under the equity based compensation plans as determined using the treasury stock method.

Net dividends: We define net dividends as dividends declared less proceeds received for the issuance of shares pursuant to the Dividend Reinvestment Plan. Management monitors net dividends and net dividends as a percentage of fund flows from operations to assess our ability to pay dividends.

Operating netback: Sales less royalties, operating expense, transportation costs, PRRT, and realized hedging gains and losses presented on a per unit basis. Management assesses operating netback as a measure of the profitability and efficiency of our field operations. In contrast, fund flows from operations netback also includes general and administration expense, corporate income taxes, and interest. Fund flows from operations netback is used by management to assess the profitability of our business units and Vermilion as a whole.

Payout: We define payout as net dividends plus drilling and development costs, exploration and evaluation costs, and asset retirement obligations settled. Management uses payout and payout as a percentage of fund flows from operations (also referred to as the **payout or sustainability ratio**) to assess the amount of cash distributed back to shareholders and re-invested in the business for maintaining production and organic growth.

Return on capital employed (ROCE): ROCE is a measure that we use to analyze our profitability and the efficiency of our capital allocation process. ROCE is calculated by dividing net earnings before interest and taxes (“EBIT”) by average capital employed over the preceding twelve months. Capital employed is calculated as total assets less current liabilities while average capital employed is calculated using the balance sheets at the beginning and end of the twelve-month period.

The following tables reconcile net dividends, payout, and diluted shares outstanding from their most directly comparable GAAP measures as presented in our financial statements:

(\$M)	Q1 2021	Q1 2020
Dividends declared	—	90,067
Shares issued for the Dividend Reinvestment Plan	—	(7,645)
Net dividends	—	82,422
Drilling and development	79,512	227,433
Exploration and evaluation	3,851	6,271
Asset retirement obligations settled	7,023	3,732
Payout	90,386	319,858
% of fund flows from operations	56 %	188 %

('000s of shares)	Q1 2021	Q1 2020
Shares outstanding	159,349	157,020
Potential shares issuable pursuant to the VIP	6,669	3,405
Diluted shares outstanding	166,018	160,425

The following tables reconciles the calculation of return on capital employed:

(\$M)	Twelve Months Ended	
	Mar 31, 2021	Mar 31, 2020
Net earnings (loss)	301,041	(1,325,252)
Taxes	59,037	(180,479)
Interest expense	74,330	80,380
EBIT	434,408	(1,425,351)
Average capital employed	4,103,659	4,816,006
Return on capital employed	11 %	(30)%
